

**The Islamic State is not Islamic!**

**The Islamic State is not a state!**

**It is a cult driven, military and criminal organization: "DAESH".**

"Daesh" hides its geopolitical interests behind a pseudo-religious discourse, in order to rope in young people who have been abandoned by their family (families) and their society.

The youth who succeed in escaping "Daesh" give witness. Those who don't become slaves of death. There are no copies of the Koran in the "Daesh" training camps, there is no religion, only brainwashing, cruelty and rape designed to reduce these children to a state of nothingness. Having been reduced to nothing, to non-humans, they become suicidal. \*

It is therefore not a war, but only acts of war.

It is not a civil war, but only entrapment.

It is not a clash of civilizations but only brothers who have not yet met.

These are not terrorists but only pathetic assassins.

**They will therefore be judged and condemned by the laws of our democracies!**

Just as our societies are globalizing, so are these groups of outlaws, while at the same time, the foreign policies of the world's great powers are playing with fire. They are defending short-term political and economic interests while forming self-centered alliances favorable to themselves.

The only valid way to answer back is to create a unified group of all the democracies in our world. And, since one cannot expect to impose democracy on a people by the use of force, we will have to help the people who believe in democracy, men and women from these countries, to build their own democracies. Thus, **women and men** will have to work together to help each other to succeed in such an effort.

That is why the world's democracies need to clean up their act! And the different communities of which they are composed need to do so as well!

**Freedom of thought**, no matter the particular religion or the absence of religion, **you** have **your** place in the French republic. France is the country of separation of religion and state, it is the country of non-sectarian government!

**Liberty, Equality, Fraternity, Justice, Secularism!**

*Despite the horror, let's have some humor:*

*"Statistics show clearly that there are more and more foreigners in the world!"*
